■ **Kevin Weaver's** specialties include Windows, the Internet, Microsoft Office and WordPerfect.

■ **Janet Weaver** is a highly sought-after consultant who specializes in solving the problems of small businesses using QuickBooks.

**Manage your business,
not your technology.**

Customized Programming Solutions

Are you tired of trying to fit your business needs into a software program not specifically designed for your industry? We can help. Our stable of programmers can design a customized solution to solve any problem. We program in Access, SQL, VB, Dbase, FoxPro, AlphaFive, and other languages upon request.

Accounting Software Set Up and Support

We have been Peachtree Partners and Certified QuickBooks Professional Advisors for more than 10 years (and we have 150 installations to prove it). We have also developed a wide range of Order Entry/ Inventory front-end solutions and created myriad reports using Crystal Reports.

Customized Seminar-Style Training

Instead of generic, one-size-fits-all training seminars, we offer a different approach: We focus on your specific needs. Before the seminar we will complete a customized needs analysis in order to ensure that your staff gets the most bang for your buck. Whenever possible, we strive to include actual examples from your business in the teaching materials.

eTraining & eSupport

Abaca.net uses the latest technology to provide you with efficient training and support options. We conduct these group or individual support sessions over the Internet. You view the training or support session from your computer, and you can speak to us on the phone simultaneously.

Software Product Support

We offer programming, training, troubleshooting, consulting and support on the following software products. Call us for more information.

- Access
- AlphaFive
- Business Works
